

PEAK POWER "U" HOUSING DRIVE

The 230V size 23 F5 "U" housing peak power unit is now available. With a continuous current rating of 264A and a thirty second peak current rating of 450A, this drive can handle the most difficult elevator applications while providing superior ride quality. Available with either TTL or EnDat encoder card feedback. Additional feedback cards are available upon request.

NEW BUILDING EXPANSION

KEB is continuing its strong presence in the elevator market and planning for the future with a building expansion. This expansion will increase the physical footprint from 80,000 square feet to 150,000 square feet, creating additional manufacturing, test, and stocking capabilities.

LONG ENDAT CABLE

An extra-long 110m (360ft.) encoder cable for use with EnDat encoders is now available for challenging MRL or remote machine room applications. This special low-loss cable includes a direct SubD connection into the F5 Elevator drive. Additional encoder cable adapters are also available eliminating the need to cut or splice a cable.

KEB ELEVATOR APP

Finally, we are excited to announce the release of the KEB Elevator app. The app allows anyone with an Apple or Android smartphone to connect to the drive via Bluetooth. Parameter adjustments, uploads, and troubleshooting diagnostic screens are several available features in the app.

HIGHLIGHTS

- Download on Apple or Android device
- Connects via Bluetooth
- Adjust parameters and perform uploads
- See troubleshooting diagnostic screens
- And more!

ABOUT KEB AMERICA

New building trends are emerging which require new drive technology. More powerful drives, line regeneration, and low harmonic solutions are constantly in demand so building loads can operate trouble-free. KEB America, located in Shakopee, Minnesota, is your North American partner for elevator drives, regenerative units, harmonic filters, and more.

With KEB you can expect to find innovation that comes with more than two decades of experience in elevator applications. KEB has been a leader in drive technology for over 25 years.

With a worldwide installed base of over 150,000 units KEB is a trusted partner in elevator and escalator applications. Globally, KEB has four production sites and a service network spanning 30+ countries. Dedicated elevator and escalator application engineers are available to provide support and sales assistance.
